

Knockout Drawers

Knock Out Drawers

Under Grinder Knock Out Drawer

The Under Grinder Drawer is designed to fit under most popular coffee grinders. Its self-contained drawer unit is easily removed to empty coffee grounds and clean. The robust stainless steel construction ensures many years of maintenance-free operation. The Mini model is a compact version for use with the semi-professional models and smaller grinders.

Under Counter Tilt Drawer

The Under Counter Tilt Drawer is designed to fit neatly under a counter top. The drawer can be removed to empty the coffee pucks. Please note that all Under Counter Drawers must be fixed onto solid timber frames or metal structures and secured using suitable fixtures. Failure of the mounting may occur if mounted to MDF or chipboard.

High Capacity Knock Out Drawer System

The Top Tilting Knock Out Drawer is designed to fit underneath a counter top and tilts as the handle is pulled forward. The coffee grounds, when knocked out of the filter holder, then drop into the Lower Sliding Drawer which is located directly underneath the tilting drawer. The Lower Sliding Drawer is normally lined with a bin liner, which is taken out and disposed of when full. Both the Top Tilting Drawer and the Lower Sliding Drawer must be fixed onto a solid timber frame or metal structure and secured using suitable fixtures. Failure of the mounting may occur if fitted to MDF or chipboard.

Technical Specifications

Model	Height	Width	Depth
Under Grinder	80mm	250mm	430mm
Mini Under Grinder Drawer	62mm	165mm	270mm
Under Counter Tilt Drawer	312mm	225mm	250mm
Cut out required in counter front for mounting the under counter knockout drawer.	280mm	193mm
